Lab Name:	Starting the Nomad Service
Section Number:	3
Lecture Number:	13

Installing Nomad using Package Manager

1. Open `/etc/nomad.d/nomad.hcl` in a text editor (vi, nano, etc.)

```
$ sudo vi /etc/nomad.d/nomad.hcl
```

2. Create the file based on the example found on my GitHub
   https://btk.me/nomad_server

3. Save the file

```
ESC:wq
```

4. Start the Nomad service

```
$ sudo systemctl start nomad
```

5. Validate the Nomad service is running

```
$ sudo systemctl status nomad
```

6. Check to see if Nomad server is responding

```
$ nomad server members
```

7. Optionally, view the journal logs

```
$ sudo journalctl -b -u nomad
```
